

Dr. Hüseyin Sancar Bozkurt – Curriculum Vitae

Dr. Hüseyin Sancar Bozkurt graduated from Trakya University Faculty of Medicine and completed his Internal Medicine residency at Çukurova University Faculty of Medicine. He then specialized in Gastroenterology at Adana Başkent University, further strengthening his expertise in this field.

He continued his academic career for six years as an Assistant Professor at Istanbul Maltepe University Gastroenterology Clinic, focusing extensively on gastrointestinal microbiota and conducting numerous significant scientific studies. He collaborated on microbiome research with the world-renowned gastroenterologist Prof. Dr. Eamonn Quigley.

Dr. Bozkurt is known for his innovative approaches in gastroenterology and microbiota research. He is the inventor of the Endoscopic Bifidobacterium Administration/ Secondary Bacterial Transfer Therapy. His groundbreaking scientific studies earned him the distinction of being the first researcher to prove that microplastics can be biologically degraded by Bifidobacterium. His contributions to the field have been published in numerous national and international scientific articles and have been recognized with prestigious international awards. Additionally, he was invited to join Sigma Xi, one of the world's oldest and most esteemed scientific communities.

Dr. Hüseyin Sancar Bozkurt is the founder of Bioprobif, a pioneering biotechnology and probiotics company. As part of this initiative, he developed the probiotic product "Probif," which contains Prebiotic XOS, Probiotic Bifidobacterium Infantis, and Postbiotic Alginate. He also led innovative research in producing biodegradable food packaging and bioplastic materials based on probiotic Bifidobacterium.

International Recognition & AGA Fellow (AGAF) Title

Due to his outstanding scientific contributions and academic achievements in gastroenterology, Dr. Hüseyin Sancar Bozkurt was honored with the prestigious "AGA Fellow" (AGAF) title by the American Gastroenterological Association (AGA), one of the world's leading medical organizations.

This title is awarded exclusively to individuals who have made profound contributions to the field, distinguishing themselves through academic and clinical excellence. Dr. Bozkurt achieved the remarkable distinction of being only the second Turkish physician in the last 20 years and the sole recipient in the last 11 years. Additionally, he holds the record as the youngest Turkish gastroenterologist to receive this prestigious title.

Dr. Bozkurt's recognition with this award is not only a personal milestone but also a testament to Turkey's rising prominence in the medical world. Representing his country on an international stage, he continues to inspire young physicians through his academic contributions, groundbreaking research, and commitment to high-quality patient care.
